PROJECTS

Maaser Tracking Application - github.com/rusyrichter/MaaserTracker.git
A React application built with MUI, keeping track of income and maaser.

BlogPostApplication - github.com/rusyrichter/BlogPostReact
A comprehensive, multi-user, blogpost application. Being a real, live imitation of Stack Overflow, it allows multiple users to answer and submit questions with question tags

Bookmarking Application - github.com/rusyrichter/ReactAuthorization
A React application styled with bootstrap, which allows users to organize and manipulate their bookmarks. Implemented frontend and backend user authentication to allow for sign up/login and protected routes.

Shudduch Matching Application - github.com/rusyrichter/ShudduchMatchingWebsite
An incredible react application used to organize shidduchim, making it every shadchan's dream! Includes multi-factor authentication, upload and download resume and picture, matching up the girls to the boys, as well as many other features. Come check it out!

WORKEXPERIENCE

Sept 2022 – Present **Medical Billing, Signet Health Care, Lakewood, NJ**
Managing accounts receivable for nursing homes to ensure continuity of coverage.

- Involved in Medicare and HMO billing and follow up.
